PROFESSIONAL SUMMARY

BCA student with hands-on experience architecting cross-platform mobile applications using Flutter and building modern web applications with Next.js, React, and TypeScript. Experienced in designing scalable application architectures, integrating Firebase backends, and managing production deployments through GitHub Releases and Vercel. Focused on building real-world software systems, responsive interfaces, and modern frontend experiences.

TECHNICAL SKILLS

Languages: Dart, JavaScript, TypeScript, SQL
Frontend: Flutter, React, Next.js, Tailwind CSS, HTML, CSS
Backend & Database: Firebase (Auth, Firestore), Node.js, MySQL
Tools & Platforms: Git, GitHub, Firebase Console, Vercel, VS Code

PROJECTS

PULSE - Attendance Intelligence Platform

Flutter · Dart · Firebase · GitHub

- Architected and developed a cross-platform attendance tracking application with real-time analytics, subject-wise insights, and attendance prediction systems.
- Designed responsive Flutter frontend architecture with integrated Firebase authentication and Firestore backend.
- Implemented scalable attendance analytics system and created APK deployment workflow using GitHub Releases.
